

HR & People Operations Portfolio

Shreyasha Bhattacharjee

Recruitment & Talent Acquisition | HR Operations | People Analytics | Employee Engagement

MSc Management, University of Chester

[bhattacharjeeavantika3@gmail.com] | [+91 969372693] | [linkedin.com/in/shreyasha-bhattacharjee-397344194]

Fictional case studies / simulated data

Profile

HR fresher | MSc Management, University of Chester

Profile

PROFILE

I am an MSc Management graduate building a career in HR, Talent Acquisition and People Operations. My academic work strengthened my ability to research business problems, analyse information, communicate clearly and organise work systematically. I bring transferable experience from customer-facing retail and social media internship settings, including handling queries, coordinating tasks, understanding audiences and maintaining professional communication. I am now developing these strengths into practical, evidence-led HR workflows.

CAREER FOCUS

Entry-level HR | Talent Acquisition | Recruitment Coordination | HR Operations | People Analytics support | Employee Engagement

TRANSFERABLE STRENGTHS

- **Research and structured problem-solving**
- **Data interpretation and attention to accuracy**
- **Clear written and verbal communication**
- **Stakeholder and customer-facing coordination**
- **Organised task follow-through**
- **Professional discretion and willingness to learn**

CORE SKILLS

Recruitment process mapping; job description drafting; structured screening; interview coordination; onboarding workflow design; basic workforce metrics; pulse-survey interpretation; spreadsheet organisation; documentation and presentation.

BOUNDARIES OF THIS PORTFOLIO

Important note: All company names, people, candidate records, employee records and figures shown in this portfolio are fictional. Practical work is independently created simulated portfolio work for learning and showcase purposes, not actual employment or client work.

Portfolio Map & Skills

Four workstreams, practical tools and transparent development areas

Portfolio Map & Skills

A concise view of the workstreams, outputs, and capabilities shaping this portfolio.

Four-workstream map

1. Recruitment & Talent Acquisition

Portfolio outputs

Role brief, sourcing plan, scorecard, tracker

2. HR Operations

Portfolio outputs

Onboarding flow, checklist, employee data schema

3. People Analytics

Portfolio outputs

Workforce metrics, assumptions, dashboard summary

4. Employee Engagement

Portfolio outputs

Pulse survey, interpretation, practical actions

Skills snapshot

Current working skills	Developing skills
Excel / Google Sheets basics	advanced Excel formulas and dashboards
Docs and Forms	HRIS exposure
structured writing	ATS workflows
research and synthesis	employment-law foundations in India
presentation design in Canva	survey design and statistical confidence
process mapping	data visualisation

How I work

Clarify the people problem → structure the process → document assumptions → check data quality → communicate the next action

Tools used in simulated work: Excel / Google Sheets, Docs, Forms

Skill levels are self-described and intended as a transparent starting point, not formal certification.

PROJECT 1 ••

Recruitment & Talent Acquisition

Simulated case brief | Northstar Retail Services

DEFINE — SOURCING — ASSESSMENT — SELECTION — ONBOARDING

Project 1 · Recruitment & Talent Acquisition

Simulated portfolio project | Fictional company: Northstar Retail Services

Scenario: hire 1 HR Coordinator for a fictional 12-person retail services workforce.

CASE BRIEF

Northstar Retail Services needs an entry-level HR Coordinator to support recruitment administration, employee records, onboarding logistics and day-to-day people coordination.

ROLE REQUIREMENTS

Organised follow-through; clear written communication; comfort with spreadsheets and data accuracy; discretion with employee information; willingness to learn HR processes; reliable availability for the defined schedule.

HIRING OBJECTIVES

Create a consistent, fair and auditable hiring process; assess must-have capabilities against the role; reduce subjective decision-making; maintain candidate communication; reach a documented recommendation within 14 calendar days.

14-DAY PROCESS

TIMING	PROCESS STEP
Days 1–2	confirm role brief and scorecard
Days 3–5	source and review applications
Days 6–7	structured phone screens
Days 8–10	structured interviews
Days 11–12	consolidate evidence and references only with consent
Days 13–14	decision, offer or respectful closure

SOURCING CHANNELS

Illustrative channels: LinkedIn / job board post, university careers service, employee referral, and a general careers page. Use the same role information and criteria across channels.

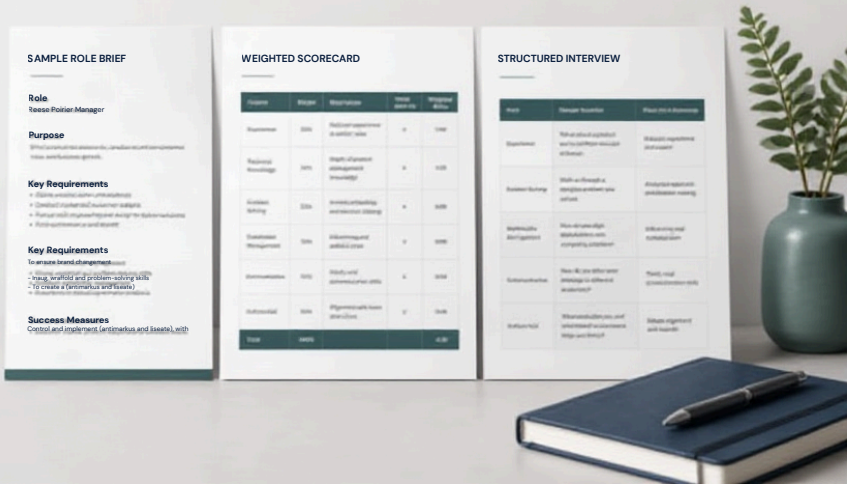

FAIR & INCLUSIVE SCREENING PRINCIPLES

Assess job-relevant evidence only; use the same core questions; record reasons for decisions; provide reasonable adjustments where requested; avoid assumptions based on names, accents, age, gender, family status, disability, religion or background; protect candidate data; check local legal and policy requirements before real-world use.

Method note: this is a designed process, not a report of implementation.

Recruitment Deliverables

Sample role brief, weighted scorecard and structured interview

Recruitment Deliverables

Simulated portfolio project | Northstar Retail Services

HR COORDINATOR · SAMPLE JOB DESCRIPTION

Purpose: support accurate, timely and respectful people processes across recruitment administration, employee records and onboarding coordination.

Key responsibilities: maintain recruitment trackers; schedule interviews; prepare candidate communications; organise onboarding documents; update approved employee records; support basic reporting; escalate confidential or complex matters appropriately.

Working style: organised, service-minded, detail-aware and willing to learn.

Screening scorecard

Criterion	Weight	Evidence to look for
Relevant education	15%	Relevant qualification, coursework or equivalent learning
Communication	20%	Clear, concise answers and audience-aware written or verbal examples
Organisation	20%	Examples of prioritising, tracking tasks and meeting deadlines
Excel / data accuracy	20%	Spreadsheet checks, careful data entry and error-spotting
Confidentiality / judgement	15%	Appropriate handling of sensitive information and sound escalation
Availability	10%	Clear availability aligned with role requirements

Scoring rule: Rate each criterion from 1–5. Weighted score = (rating ÷ 5) × weight. Add the six weighted scores for a total out of 100.

Structured interview questions

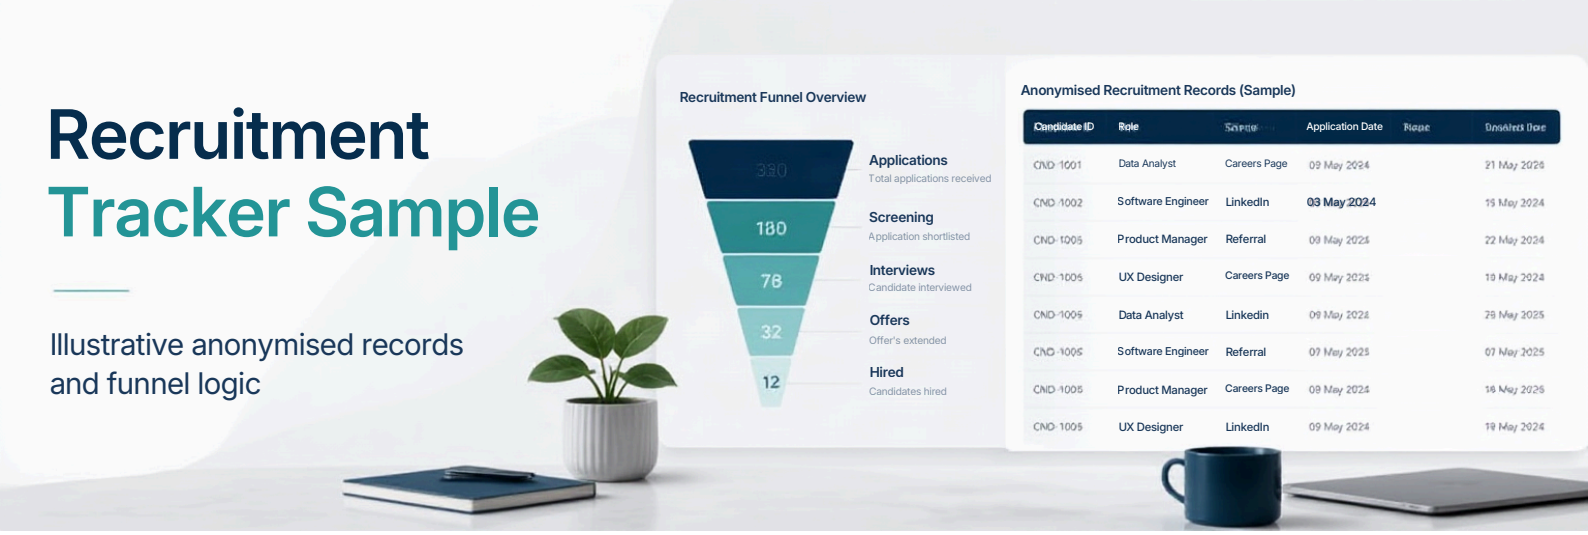

1. Tell us about a time you organised several priorities.
2. How would you check a spreadsheet before sharing it?
3. Describe a situation where you handled confidential or sensitive information appropriately.
4. How would you communicate a delay to a candidate or manager?
5. What would you like to learn in your first 90 days in HR?

Evaluation discipline

- ask the same core questions
- capture evidence, not impressions
- score independently before discussion
- record a brief job-related rationale
- document reasonable adjustments and agreed next steps

Recruitment
Tracker Sample

Illustrative anonymised records and funnel logic

Recruitment Tracker Sample

Illustrative only | fictional anonymised candidate data

This editable tracker demonstrates how a recruitment process can be documented using fictional, anonymised records and job-relevant evidence only.

Candidate tracker

Candidate ID	Source	Must-have check	Score / 100	Status	Next action
C-001	University careers service	Pass	82	Offer	Prepare fictional offer pack
C-002	LinkedIn / job board	Pass	76	Interview	Confirm structured interview
C-003	Employee referral	Pass	68	Hold	Review against shortlist evidence
C-004	General careers page	Pass	61	Screen	Complete structured phone screen
C-005	LinkedIn / job board	Fail	48	Rejected	Send respectful closure message
C-006	University careers service	Fail	42	Rejected	Send respectful closure message

Stage legend

Stage	Meaning
Applied	received
Screen	phone screen pending
Interview	structured interview
Hold	evidence review
Rejected	not progressed
Offer	fictional offer stage

Illustrative funnel summary

This funnel is illustrative, not a hiring result.

Process stage	Illustrative count	Process view
Applications	6	
Must-have passes	4	
Interviews completed	2	
Hold for review	1	
Offer recommendation	1	

Data handling note

Use candidate IDs rather than names in a portfolio; include only job-relevant fields; do not publish CVs, contact details, demographic data or sensitive personal information.

Project 2 · HR Operations

Simulated portfolio project | Fictional company: Northstar Retail Services | 12-person sample workforce

Fictional data notice

All employee data and process details on this page are fictional.

This page maps a practical onboarding journey from offer acceptance through the first 30 days, with clear ownership, approved handling routes, and lightweight review points.

Onboarding workflow

Offer accepted →	Pre-boarding →	Day 1 →	Week 1 →	Day 30 check-in
Confirm start date, role and contact route.	Send welcome note, checklist and policy reading; collect only approved documents.	Identity/access checks by authorised staff, introductions, role context, questions.	Workflow shadowing, manager check-in, systems orientation.	Two-way review, early support needs, learning priorities and next steps.

Workflow principle

Keep each handoff visible, proportionate, and limited to the information needed for the next approved action.

Document checklist

- [ ] Offer / employment documentation as applicable
- [ ] Identity or right-to-work evidence handled by authorised staff
- [ ] Bank/payroll details handled through secure approved channel
- [ ] Emergency contact where required
- [ ] Policy acknowledgement
- [ ] Equipment/access record

Privacy boundary

The portfolio does not display document contents or sensitive personal data.

First-day schedule

Time	Activity
09:30	Welcome and setup
10:00	Team introductions
11:00	Role and priorities
12:00	Break
13:00	Systems/process orientation
14:30	Questions and support routes
15:30	Manager check-in
16:00	Close and next steps

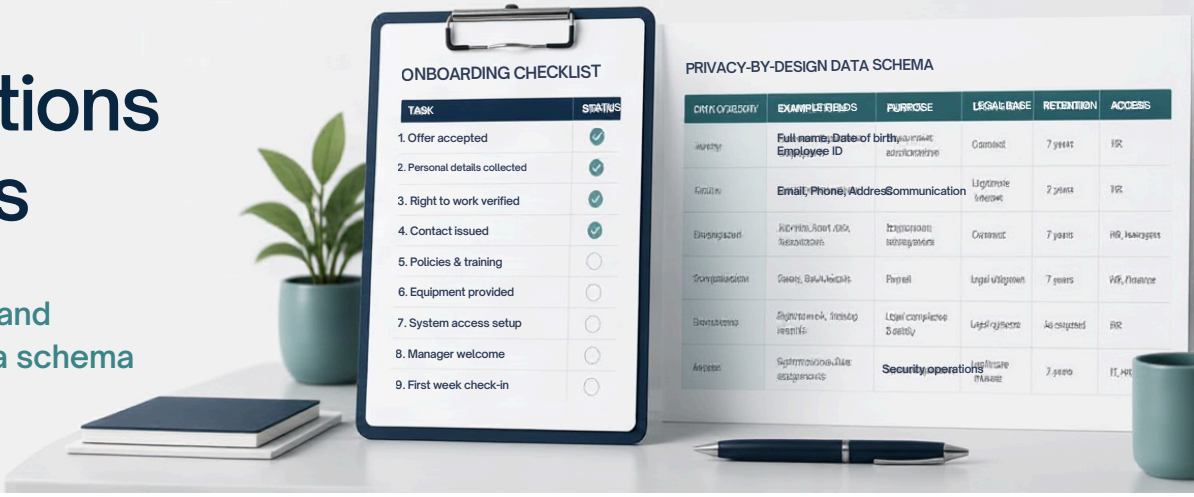

Leave / attendance tracker fields

- **Employee ID**
- **Date**
- **Request type**
- **Start date**
- **End date**
- **Working days**
- **Approval status**
- **Approver**
- **Attendance note**
- **Audit timestamp**

Fields are examples only; policy and statutory requirements must be checked before real use.

HR Operations Templates

Onboarding checklist and privacy-by-design data schema

HR Operations Templates

Simulated templates | Fictional sample data

Editable onboarding and employee-data templates for a fictional HR operations workflow. Use approved systems and adapt fields to local requirements.

Onboarding checklist

Stage	Task	Owner	Status	Evidence / note
Offer accepted	confirm start date	HR coordinator	Not started	approved confirmation
Pre-boarding	send welcome pack	HR coordinator	Not started	message sent
Pre-boarding	confirm access request	Manager / IT	Not started	access ticket
Day 1	complete orientation	Manager	Not started	check-in recorded
Week 1	review early questions	Manager / HR	Not started	support actions
Day 30	conduct two-way check-in	Manager / employee	Not started	next-step notes

Sample employee master data schema

Field	Purpose	Access principle
Employee ID	unique internal reference	HR / authorised users
Preferred name	day-to-day communication	role-based access
Job title	role administration	HR / manager
Team / manager	workflow ownership	role-based access
Start date	tenure and onboarding	HR / manager
Employment status	workforce reporting	HR / authorised users
Work location	operational coordination	need-to-know
Review date	development cadence	HR / manager

This fictional schema excludes real names, home addresses, personal phone numbers, bank details, identity numbers, health data and other sensitive personal data.

Privacy-by-design controls

- Minimum necessary data
- Role-based access
- Secure approved storage
- Clear retention and deletion rules
- Audit trail for changes
- No sensitive personal data in a public portfolio

Method note: schema is illustrative and must be adapted to local law, policy and system controls.

Project 3 · HR Analytics

Simulated portfolio project | Fictional monthly workforce dataset

All values are fictional and illustrative.

Monthly dashboard summary

Average headcount: (11 + 12) / 2 = 11.5. Monthly attrition: 1 / 11.5 × 100 = 8.7% rounded.

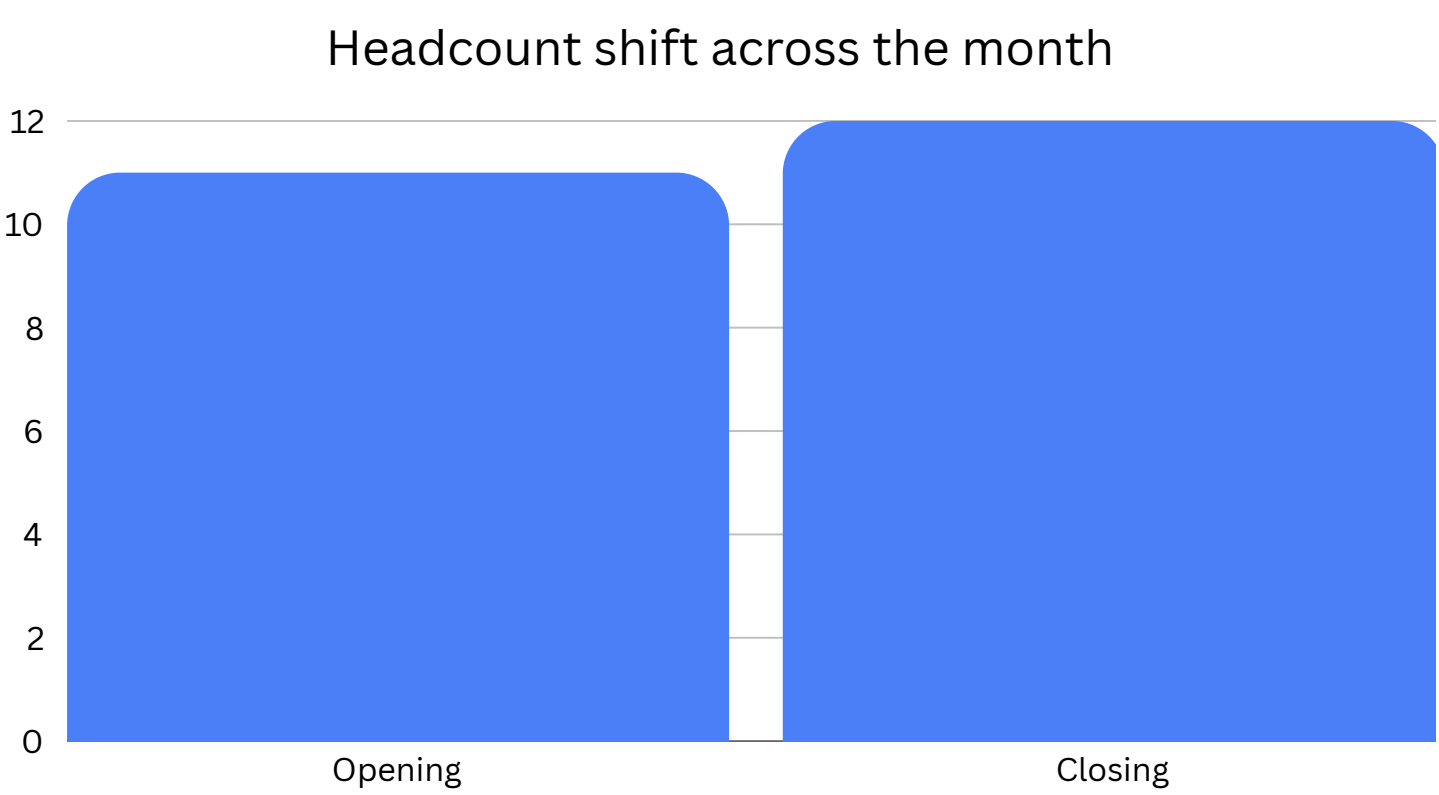

Opening headcount	Joiners	Leavers	Closing headcount
11	2	1	12

Illustrative monthly metrics

Metric	Value	Definition
Opening headcount	11	people at period start
Joiners	2	people who joined during period
Leavers	1	people who left during period
Closing headcount	12	people at period end
Average headcount	11.5	simple average of opening and closing headcount
Monthly attrition	8.7%	leavers ÷ average headcount × 100

Opening versus closing

The sample closes one person higher than it opened: 11 at opening and 12 at closing.

Source: AI-generated data. Replace or verify before use.

Interpretation

In this illustrative month, the sample closes one person higher than it opened because 2 joiners offset 1 leaver. The 8.7% monthly attrition figure should not be treated as a trend or benchmark from one month of data.

Metric limitations

- Small denominator makes percentages volatile.
- Simple average headcount is an approximation.
- Timing within the month is not captured.
- Reasons for leaving and employee groups are not analysed.
- Definitions should be standardised before comparison.

All values shown are fictional and illustrative; they do not represent real organisational results.

PROJECT 4 ·

Employee Engagement

Fictional pulse survey and practical actions

Project 4 · Employee Engagement

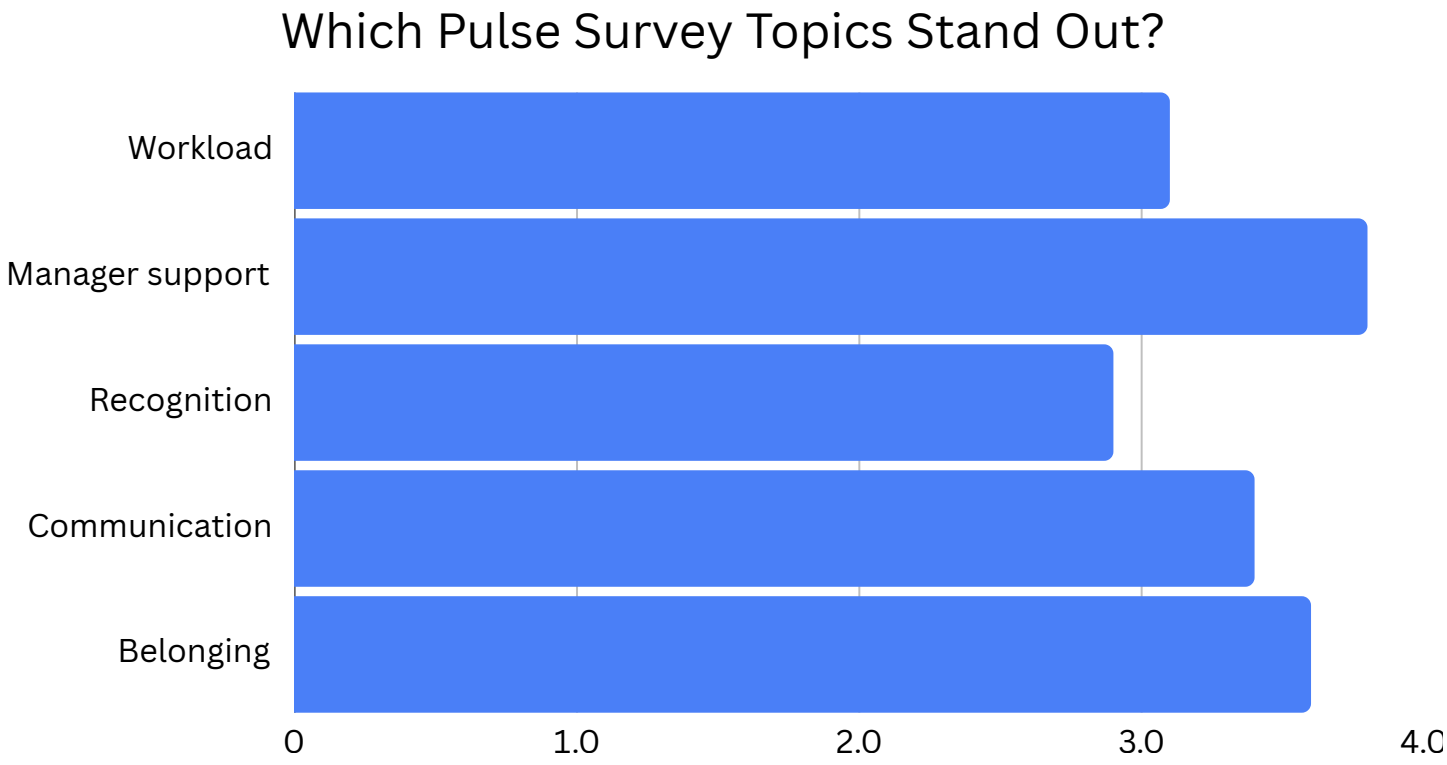

Simulated portfolio project | Fictional pulse survey

Illustrative results from 12 fictional employees; 5-point scale; not generalisable.

Pulse survey summary

Dimension	Illustrative average / 5	Reading
Workload	3.1	Mixed capacity signal
Manager support	3.8	Generally positive, with room to strengthen consistency
Recognition	2.9	Opportunity to improve timely appreciation
Communication	3.4	Adequate, but clarity may vary
Belonging	3.6	Positive base with scope for inclusion practices

Illustrative visual summary

Source: AI-generated data. Replace or verify before use.

1 = strongly disagree, 3 = neutral / mixed, 5 = strongly agree.

Methodology note

Illustrative pulse survey using five dimensions and a 5-point response scale. In a real survey, define question wording, response window, anonymity approach and minimum response threshold in advance.

Interpretation

The sample's strongest signal is manager support, while recognition and workload are comparatively lower. These results indicate areas for follow-up questions, not conclusions about a real workforce.

Three practical actions

1. Run a short workload and prioritisation check with managers
2. Introduce a consistent recognition prompt in team routines
3. Publish a simple communication calendar and invite questions

Limitations

n=12 is small; averages can conceal different experiences; response bias and question wording may affect results; no causal claims are made.

10 / 10
